Gentlemen:

We herewith order you to go ahead with the wire mesh enclosure at the head of the stairs on our balcony, as per your quotation of April 14th. We wish that before making this, you would send us your shop drawing as Mr. Robert Eidlitz, who is one of our officers, wishes to look this over first.

1 1/2 - 2"

The sides and top will be the same kind and mesh wire, that is, 1 1/2" square mesh, 1/4" inch flat wire, the gate to be fitted with Rim Cylinder lock, to be opened from either side. There should be a coil spring on the door which you did not figure on, The ~~wood~~ <sup>whole</sup> to be painted black. The grill is to go fairly close to the floor but not touching it, so that it will not collect dirt. The hand hole is to begin 24" from the north wall and the bottom is to be 38" from the floor, the opening to be 8" high and 12" wide. The shelf to be 6"x 12", 4" inside and 2" outside with rounded corners. The gate is to be 2'6".

The Tucker Electric Co. will do the electrical work and I have notified them to confer with you concerning the electrical door opener.

Very truly yours,

Curator

Mr. Howard Wood,  
American Numismatic Society,  
New York, N. Y.

Dear Sir:

Mr. Wurster of The Tucker Electrical Construction Company telephoned us and requested us to send a man to meet him Tuesday morning at The American Numismatic Society and make some plates to which he is to fasten his electric door opener.

He informed us this work was to be charged to The American Numismatic Society. Kindly advise us if this meets with your approval, and oblige

Very truly yours,

JOSHUA HORROCKS, INC.

Gentlemen:

It was at my request that Mr. Wurster telephoned you the other day. He has been bothered somewhat by the structure of the lock, etc. and did not have a chance to confer with you before the grill was set up. Additional work on your part for the installation of a plate, you are to charge to this Society.

Very truly yours,

Curator
